Check Tutorial tab to know how to solve.

The included code stub will read an integer, **n**, from STDIN.

Without using any string methods, try to print the following:

123...**n**

Note that "...", represents the consecutive values in between.

Example

n = 5

Print the string 12345.

Input Format

The first line contains an integer **n**.

Constraints

$1 \leq n \leq 150$

Output Format

Print the list of integers from **1** through **n** as a string, without spaces.

Sample Input 0

3

Sample Output 0

123
